CHANNEL MASTER '74 THE NATURAL SOUND

Channel Master, Ellenville, New York

Channel Master, Far East, Taiwan

Channel Master, White Mills, Pa.

The Natural Sound of Channel Master results from years of development of the world's most powerful and widely respected line of TV/FM reception equipment. Channel Master found its origins in the manufacture and design of color and black and white TV antennas, and today leads the field. This quite naturally led to the development of suitable equipment to receive their signals.

Channel Master introduced its first entertainers in 1958 with a select line of radios and home stereo receivers. They were well received, and as time went on, achieved a remarkable record and reputation for quality.

This is testified by the fact that the majority of Channel Master radios purchased in 1958 is still in active service, with a repair free record. Ask the man who owns one!

Production facilities are headquartered in Ellenville, N.Y., with branch operations in Taiwan, Tokyo, and White Mills, Pa.

In addition to the highest quality craftsmanship, Channel Master has striven to reward the purchaser with extra features for the dollar---in home stereos that create an environment; radio with the features and sound of hi-fi; solid state TV sets and public service equipment with preset weather frequencies.

All Channel Master products are subjected to rigorous quality control testing before being released for shipment---with the result that Channel Master is able to offer one of the industry's strongest guarantees.

Welcome to the Natural Sound of Channel Master --- we know you'll derive years of pleasure from it!

- Channel Master, Tokyo
- Channel Master, New Bremen, Ohio
- Channel Master, St. Thomas, Ontario

Cassette Player Recorders

With added features to boost your listening pleasure

AUTOMATIC LEVEL CONTROL: Balances near and far sounds during group recording for uniform playback level.

AUTOMATIC SHUTOFF: Turns off the amplifier and motor when the cassette has ended. Extends tape and battery life by preventing excess wear and tear.

CONDENSER MIKE: Extra sensitive omni directional microphone built right into the recorder. It's always right there when you need it. Never lost or mislaid. Eliminates awkward mike passing and mike fright.

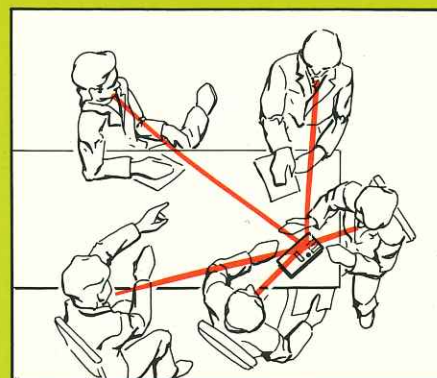

DIRECT RECORD: Special circuitry that allows you to record directly from the radio as you listen without speaker distortion or unwanted noise.

EASY LOAD CASSETTE DOOR: Positions the cassette precisely without awkward fumbling.

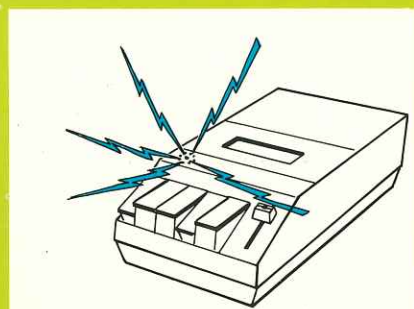

EJECT: Raises the cassette for easy removal.

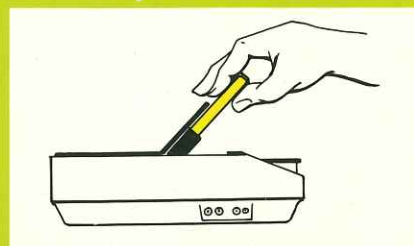

AC/BATTERY: Operates on batteries or plugs in without separate adaptor.

INTRODUCING

CHANNEL MASTER

Dimensional Sound Home Stereo Systems

THE SOUND THAT PUTS YOU IN CENTER STAGE!

4 Dimensional Sound redirects stereo through four speakers to provide a total environmental sound effect. 4-D breaks the 2 channel sound barrier by stretching your stereo entertainment to deliver four different sounds from four different speakers. The result is increased tone quality, greater balance and the heightened sense of presence of a live concert.

4 Dimensional sound sets you in the middle of the recording atmosphere. Once you hear it--you'll never settle for less!

All Channel Master Stereo Component Systems bearing the 4 dimensional tag will give you 4-D sound when you add an optional pair of speakers.

Added features enhance your listening pleasure

LOUDNESS CONTROL

Gives you the musical best from your records without turning the volume way up.
Full response at low volume.

AUTOMATIC FM STEREO SWITCHING

Automatically changes mode from monaural to stereo when it receives FM multiplex signal.

HIGH AND LOW CUT FILTER SWITCHES

Eliminates noise that may be present at the high or low ends of the audio frequency range in radio reception or record playing, to give you clean, clear sound.

CHANNEL MASTER

AM/FM MULTIPLEX RECEIVER

model 6602

Who says you have to be rich to enjoy stereo! Our AM/FMX Receiver puts solid state circuitry into efficient action to deliver champagne sounds at a price that's right!

CHANNEL MASTER

Color and Black and White Portable TV

with extra features to keep you looking great!

Solid State Circuitry: Uses transistors and integrated circuitry instead of conventional "hot" receiving tubes. Solid state circuitry provides extreme dependability and eliminated the most common cause of TV set failure---receiving tube burn out.

Auto Color: With preset color, tint and Automatic Fine Tuning. Automatically fine tunes natural color and flesh tones when the Auto-Color switch is activated.

Black Matrix Picture Tube: Provides greater picture brightness and sharpness by placing the color producing rare earth phosphor dots against a jet black background.

Automatic Gain Control: Maintains consistently stable picture quality through varying telecasting and cable conditions.

Automatic Degaussing: A built-in function that prevents color smearing caused by magnetic interference.

Automatic Fine Tuning: Memorized the fine tuning settings on all UHF and VHF Channels, to eliminate retuning every time channels are changed.

Automatic Brightness Limiter: Limits picture brightness to maintain maximum picture sharpness.

70 Channel UHF Detent Tuner: Snaps UHF channels into sight with no guesswork. Covers all UHF channels, 14 through 83.

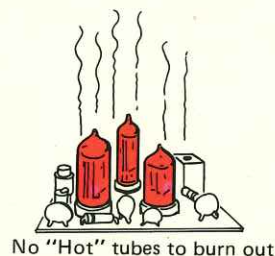

Instant-On Circuit: Snaps color and sound to life as soon as the set is turned on.

Automatic Tint Modifier: A built in circuit that electronically maintains true to life flesh tones through varying telecasting and cable conditions.

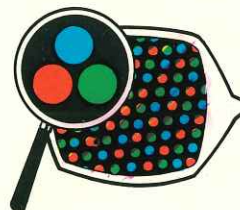

Automatic Dynamic Correction Circuit: Maintains true horizontal picture quality from edge to edge.

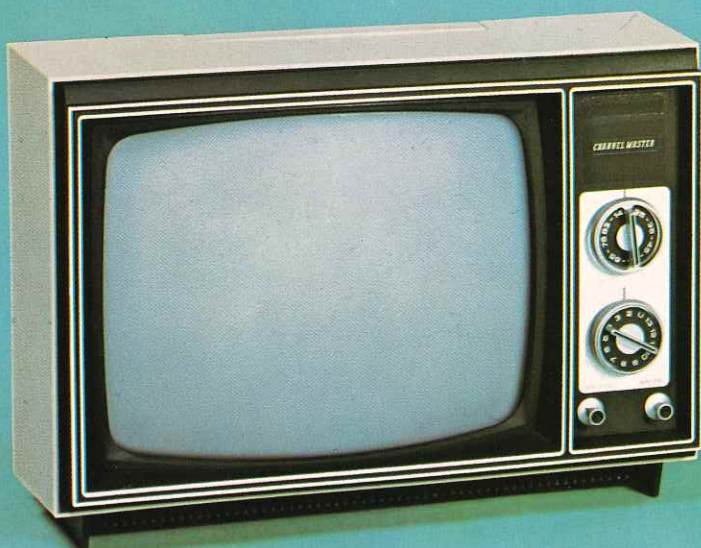

YOUR GUARANTEE OF QUALITY ON ALL CHANNEL MASTER PORTABLE TV'S

- 2 years on the picture tube with one year carry-in labor
- 5 years on the printed circuit boards
- 1 year on all other parts, with 90 day carry-in labor

Black Matrix Picture Tube
